DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 8/15/2006 has been entered.

Allowable Subject Matter

2. Claims 1-2, 4-15, 17-18, 20-29, 31-32 and 36-42 are allowed.

The following is an examiner's statement of reasons for allowance:

Referring to independent claims 1, 13, 17 and 21, the prior art of record fails to anticipate or rendered obvious the combined elements/steps of "wherein the specified electronic program guide provider, upon being connected to by the television tuning device via the indicated communication mechanism, uses the additional distinguishing information to identify the purchased portion of electronic program guide information from among other electronic program guide information maintained at the specified electronic program guide provider, and thereafter enables the television tuning device to access the purchased portion of electronic program guide", as recited in the claims in conjunction with the remaining claim limitations.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

The examiner notes that Takagawa was previously used to teach a hardware card with an embedded URL used to contact a web site, Nguyen was used to teach that an EPG could be retrieved from a web site and Tsuria was used to teach that a hardware card can be purchased. Takagawa, Nguyen and Tsuria all fail to teach that a card containing information directed toward a specific EPG can be purchased and that the information on the card is used to retrieve EPG from a remote server, as well as the hardware card containing additional data that distinguishes between different types of EPG data so that when the EPG data is retrieve from the remote server, the remote server recognizes what EPG the viewer has purchased.
